The following is an Examiner's Statement of Reasons for Allowance:

The instant claims are directed to methods of making and using oligonucleotide hybridization arrays as well as one claim to a specific array type. The attached PTO Form 892 lists a number of U.S. Patents which may have supported potential interferences but which are deemed sufficiently distinct, and may be interpreted as improvement Patents, from the instantly amended claims so as to remove this issue of potential interferences. Stavrianopoulos et al.(U.S.Patent No. 4,994,373) is the closest prior art of record but neither teaches nor suggests monomer by monomer synthesis of oligonucleotides on a surface nor the hybridization assay practice of utilizing an array of different oligonucleotide probes on a single surface. Another close prior art of record is that of Drmanac et al.(U.S. Patent No. 5,202,231) which is directed to sequencing by hybridization to

arrays on filters but neither teaches nor suggests that the surface of such arrays be impermeable. Potter et al. and Graham et al. are listed on the enclosed PTO Form 892 due to being the closest prior art of record to instant claim 71 because of disclosing polynucleotide analysis via orthogonal oligonucleotide stripes but do not teach or suggest the impermeable surface practice as now required for the practice of instant claim 71. Lastly, it is noted that the phrase "predetermined sequences" as present in several of the instant claims, such as claim 36, line 5, for example, is interpreted to require that the complete sequence of each and every oligonucleotide probe on the array surface is known during the practice of the instant claim steps.

It is noted that all sequences that are disclosed in the instant application were disclosed in the priority document, PCT/GB89/00460, filed 5/2/89, which predates the sequence rule Therefore, compliance with the sequence implementation date. disclosure rules via computer readable form submission etc. is not required for the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
